

Summer Options for High School Students

Many students and their parents are asking about summer programs or summer internships. We do not have a specific listing of summer programs, as there are so many from which to choose all across the nation. It is quite a task to find the right fit for a summer internship, and may take some time and family input. Hang in there! Here are some suggestions that may be helpful.

- Naviance has a list of enrichment programs that is updated by the Naviance staff at the national level. Many of these are enrichment and not necessarily internships, but might give you some things to think about. You can find this by opening up the Naviance website, clicking on
- Colleges > College Search > Enrichment programs
- Check with your post-secondary counselor. Most have a folder with the summer programs that they receive daily and you are welcome to look through these anytime.
- Contact parents' employers, network with parents' friends, and call businesses in the industry you want to pursue.
- If you are in AOF or ASE, consult with your teachers and see what companies they recommend interning with.
- The following websites may be helpful in your search.
